

LIGHTWEIGHT CROWD CONTROL BARRIER WITH INTEGRATED FEET, 94CM HEIGHT

Lightweight steel barriers with integrated feet, designed for guiding non-critical audiences and managing lighter foot traffic at events.

SKU: 1001054.00 | **Categories:** [Crowd Control Barriers](#)

PRODUCT DESCRIPTION

Our lightweight steel crowd control barriers with integrated feet and a height of 94cm are ideal for guiding non-critical audiences and managing areas with lighter foot traffic. Perfect for sporting events such as cycling races, marathons, and city runs, they are equally effective for public catering areas, merchandise stands, or reserving VIP parking spaces.

Thanks to their lightweight construction and hook-and-eyelet connection system, these barriers are quick to assemble and dismantle, even over extended distances. The integrated feet provide stability on various surfaces while maintaining excellent portability. Available in pre-packaged sets of 25, 50, or 75 pieces, they deliver an efficient and flexible crowd control solution for event organisers managing lighter applications.
