

POLICE BARRIER

SKU: N/A | **Categories:** [Crowd Control](#), [Crowd Control Barriers](#)

PRODUCT DESCRIPTION

The Police Barrier or Met Barrier as it is also known, is suitable for ensuring the safety of higher density crowds, courtesy of its larger triangular shaped base that can resist toppling under pressure.

It features an all-welded frame with mesh infill making it a popular choice for demonstrations, concerts and festivals where high security is needed. Its steel mesh panel with base prevents sliding.

This heavy-duty barrier is ideal for events or occasions with a heavy flow of people susceptible to heavy crowd surges. Compliant with British Standard 729, it can be used on site in specific configurations to create high security areas.

Comes in stacks of 30

PANEL SIZE:

1.5m wide by 1.06m high

COLOUR:

Galvanised finish, others available by special order
