TEMPORARY FENCE PANEL, ANTI-CLIMB, 3,5M X 2M

Our durable anti-climb temporary fence panel, 3.5m x 2m, ensures safety and controlled access, perfect for festivals, concerts, and sporting events.

SKU: 1000034-1.00 | **Categories:** Crowd Control, Mesh Fencing

PRODUCT DESCRIPTION

The Anti-Climb Temporary Fence Panel (3,5m x 2m) is specifically designed to secure events such as festivals, concerts, and sporting gatherings. Featuring an anti-climb mesh, it provides an additional layer of security by making it difficult for unauthorised individuals to scale the fence.

Constructed from durable hot-dip galvanised metal, the panel is highly weather-resistant, making it suitable for both indoor and outdoor use. These temporary fence panels are quick to assemble and dismantle, providing a secure and effective solution for controlling crowd movement and protecting restricted areas at short-term events.

Please Note:
Our Anti-Climb Temporary Fencing Panels are intended for short-term event security and are not recommended for long-term construction site use.

PANEL SIZE:

3.5m wide by 2m high
