

HI-HOARD FENCE PANEL, 2.4M X 2.4M

Hi-Hoard is a quick-install, cost-effective fencing solution offering greater strength than Heras or ready hoard alternatives – ideal for festivals, concerts, and sporting events.

SKU: 1014274.00 | **Categories:** [Security High Fencing](#), [Temporary Fencing](#)

PRODUCT DESCRIPTION

Hi-Hoard was specifically designed as a robust, budget-friendly alternative to traditional heavy-duty festival fencing. Providing significantly greater stability than Heras and ready hoard panels, it remains a trusted choice for securing perimeters at music festivals, sporting events, and large-scale public gatherings.

The fencing system is easy to install, delivering both speed and security. Thanks to its durable construction and flexible fixing options—pinning into soft ground or using a ballast system for hard surfaces—Hi-Hoard adapts well to various event environments.

Aesthetically discreet, Hi-Hoard panels have a dark green exterior and a grey or matching green interior, blending well with parkland, urban, and heritage surroundings.

Gates are available in multiple widths, ensuring seamless integration for both vehicle and pedestrian access. Whether you need crowd containment or a private backstage barrier, Hi-Hoard provides dependable protection without compromising on appearance.
