ALI MAT ALUMINIUM TRACKWAY PANEL

Ali Mat is a heavy-duty yet lightweight aluminium trackway panel designed for rapid installation and effective ground protection on event or construction sites.

SKU: N/A | **Categories:** Temporary Trackway

PRODUCT DESCRIPTION

Ali Mat offers a smart, high-performance trackway solution for temporary roadways, access routes, and load-bearing pads. Made from lightweight aluminium and delivered in stillages, it enables fast, damage-free installation using either a forklift or manual handling.

Each panel is strong enough to support heavy vehicles, yet light enough for crew to deploy by hand, reducing the risk of damage to delicate surfaces like turf or paving. Its compact design and stacking system mean fewer transport trips and faster on-site deployment.

Whether you need dry hire or a full installation service, **Ali Mat** is the versatile, reliable choice for event flooring, infrastructure, and site access.

Key Features:

- **Heavy-duty aluminium construction** for strength and durability
- **Lightweight panels** allow manual handling without specialist equipment
- **Supplied in stillages** for quick forklift movement and deployment
- **Ideal for temporary roads, access pads, and compound flooring**
- **Dry hire or full install options available**
