LD ROLLS HEAVY-DUTY FLOORING

Lightweight, modular drivable aluminium flooring for temporary access and ground protection at events, construction sites, and industrial spaces.

SKU: 1014033.00 | **Categories:** Event Flooring & Ground Protection, Temporary Trackway

PRODUCT DESCRIPTION

The LD Rolls Drivable Flooring system is an efficient and lightweight solution for temporary ground protection and access at events, construction sites, and industrial environments. Made from durable strand-cast aluminium, LD Rolls feature a smooth, slightly textured surface suitable for pedestrian traffic and light vehicles such as forklifts.

Each roll spans over 20 metres (65 feet), allowing large areas to be covered quickly and efficiently. The modular design ensures fast and easy installation without the need for specialised equipment. The thin material profile minimises tripping hazards while evenly distributing loads across surfaces, including turf, parking lots, and gravel.

For added surface protection, optional rubber mats or geotextiles can be placed underneath the rolls to minimise impact on sensitive areas, such as stadium grass or cobblestone. LD Rolls are ideal for creating temporary access routes, parking areas, and walkways, offering a versatile and portable flooring solution for a wide range of applications.

TECHNICAL INFORMATIONS

Dimensions	20 × 3 × 0.02 m
Weight	1,215 kg per 20m roll
Material	Strand-cast aluminum
Capacity	Suitable for light to moderate vehicle loads
Applications	Temporary access routes, parking areas, walkways
