TERRATRAK PLUS HEAVY-DUTY FLOORING, GREY

Terratrak Plus grey flooring provides heavy-duty turf protection, supporting vehicles and machinery with a sleek, opaque finish.

SKU: 1004337.00 | **Categories:** Event Flooring & Ground Protection, Temporary Trackway

PRODUCT DESCRIPTION

Terratrak Plus Heavy-Duty Flooring is a premium turf protection system designed to handle extreme loads while preserving the health of the turf underneath. Manufactured from high-density polyethylene (HDPE), this flooring can support loads of up to 160 tonnes, making it the trusted choice for stadium operators, greenkeepers, and event organisers worldwide.

Available in translucent and grey variants, each panel is tailored to specific needs. The translucent option allows light penetration, enabling the turf to photosynthesise even during extended coverage, reducing the need for post-event turf restoration. The grey variant delivers the same heavy-duty protection with a sleek, opaque finish, perfect for areas where light sensitivity is not a concern.

Terratrak Plus panels interlock securely using a circumferential lock system, forming a stable, continuous surface capable of supporting trucks, forklifts, aerial work platforms, and mobile cranes. Patented transition elements ensure seamless, trip-free connections to other flooring systems such as Remopla or Supa-Trac, making this flooring an ideal solution for large-scale events and construction sites.

TECHNICAL INFORMATIONS

Weight	46 kg
Dimensions	2.4 × 0.04 × 1.2 m
Colour	Grey
Material	High-Density Polyethylene (HDPE)
Accessories	Loading ramps, patented transition elements
Load Capacity	Up to 160 tonnes
