

SUPA-TRAC[®] TURF PROTECTION FLOORING

Durable Supa-Trac panels provide reliable protection for turf and sensitive surfaces, with quick installation for medium-load event applications.

SKU: 1002391.00 | **Categories:** [Event Flooring & Ground Protection](#), [Turf and Surface Protection](#)

PRODUCT DESCRIPTION

Supa-Trac[®] Turf Protection Flooring provides a flexible and reliable solution for safeguarding natural and synthetic turf during events. This modular flooring system features a patented click mechanism, enabling fast assembly and dismantling without the need for specialised tools, making it an excellent choice for stadiums, festivals, and public spaces.

Supa-Trac ensures the safety of turf and surfaces, supporting pedestrian traffic and medium-weight vehicles. Its unique air circulation and drainage design prevents moisture build-up, allowing turf to remain healthy during extended use. Lightweight and durable, the panels are constructed from polypropylene copolymer, offering long-lasting performance and ease of transport.

Whether you need temporary parking areas, walkways, or public space coverage, Supa-Trac delivers dependable turf protection while ensuring a safe and functional event environment.
