SAMSONITE FOLDING CHAIR B1 – BLACK

SKU: 1002233.00 | **Categories:** Event Chairs

PRODUCT DESCRIPTION

The Samsonite folding chair is a proven solution for temporary seating at events of any size. Its durable, weather-resistant materials make it particularly suitable for outdoor use at concerts, religious services, sporting events, and other high-attendance gatherings.

Specially designed transport trolleys ensure efficient loading, unloading, and deployment, allowing large seating areas to be installed quickly and smoothly.

This folding chair features an all-black finish and can be linked together using comfort row connectors to create secure seating rows. It is certified to the B1 fire safety standard.

The frame is manufactured from tubular steel and fitted with protective caps at all contact points to minimise movement and help prevent scratches on sensitive floor surfaces.

The ergonomically shaped seat and backrest are produced from a durable plastic compound. Three drainage holes in the seat prevent water from collecting during wet weather, making the chair suitable for outdoor applications.

When unfolded, the seat measures 40 cm × 40 cm. With row connectors installed, the seating width increases to 50 cm.

Technical Features

- Colour: Black
- Fire Rating: B1 certified
