

BLACK LINE 5-CHANNEL MOBILITY ACCESS CABLE RAMP

Durable 5-channel cable ramp with wheelchair accessibility, perfect for safe pedestrian and low-volume vehicle use at events and worksites.

SKU: 1012427.00 | **Categories:** [Cable Ramps and Protectors](#)

PRODUCT DESCRIPTION

The Black Line 5-Channel Mobility Access Cable Ramp offers a reliable solution for wheelchair-accessible and safe pedestrian and low-volume vehicle access over cables and hoses. Its modular two-piece design ensures easy storage, transport, and quick setup, making it an excellent choice for events, worksites, and public spaces.

Featuring five channels, the ramp accommodates multiple cables or hoses while maintaining a stable and accessible pathway for wheelchair users and individuals with reduced mobility. Four channels measure approximately 33mm wide, while one larger channel measures 37mm, offering versatility for a variety of cable sizes.

Engineered to withstand a maximum axle load of 4,760 kg (10,500 pounds), the ramp performs reliably under light vehicle traffic. The high-visibility black lid and red side ramps enhance safety in busy environments, while the durable construction ensures long-lasting performance. Compatible with earlier single-piece designs, this ramp provides flexible and dependable solutions for cable management.
