

MOJO BAR BARRIER STRAIGHT, PLASTIC/STAINLESS STEEL

The MOJO Bar Barrier is ideal for quick and stable event catering setups, featuring a lightweight plastic body and a durable stainless steel counter.

SKU: 1002161.00 | **Categories:** [Concert Barricades](#), [Mojo Barriers](#)

PRODUCT DESCRIPTION

The MOJO Bar Barrier combines a lightweight plastic body with a robust stainless steel counter, providing the ideal solution for setting up catering areas at events. Sharing the same stabilising base as other MOJO barriers, this bar barrier becomes stronger as guests stand on the floorplate, reinforcing its structure with their own weight.

The stainless steel serving counter is easy to clean and hygienic, making it perfect for serving food and drinks at high-traffic events. Its flexible design makes it suitable for public catering areas with light to medium crowd pressure, offering both stability and portability.

This bar barrier is also highly portable and simple to transport. It can be flat-packed and stacked, ensuring efficient storage and logistics. Corner elements are available to create enclosed areas, providing flexibility for different event setups.
