MOJO BARRIER FLEX CORNER, SILVER

The MOJO Flex Corner Barrier in silver offers adjustable angles from -90˚ to +90˚, providing flexible crowd control solutions for complex event setups.

SKU: 1001998.00 | **Categories:** Concert Barricades, Mojo Barriers

PRODUCT DESCRIPTION

The MOJO Flex Corner Barrier is designed for ultimate flexibility in shaping barricade lines at concerts, festivals, and large-scale events. With adjustable angles ranging from -90˚ to +90˚, it enables seamless transitions around FOH positions, camera platforms, and other intricate event areas.

Integrating smoothly with other MOJO barriers, the Flex Corner provides both aesthetic and functional adaptability to meet your event's specific requirements. The hinged wings allow precise angle adjustments, while the absence of a floor plate makes it suitable for uneven surfaces, ensuring versatility in challenging spaces.

For maximum stability, the Flex Corner must be supported by two adjacent MOJO Straight Barriers. Once secured, it maintains robust crowd control even in high-pressure environments. The barrier's standard interlocking system ensures easy and secure connections with other MOJO barricades, forming a continuous and reliable barricade line.

TECHNICAL INFORMATIONS
