MOJO BARRIER G3 STRAIGHT

SKU: 1011655.00 | **Categories:** Concert Barricades, Mojo Barriers

PRODUCT DESCRIPTION

The MOJO Barrier G3 is the latest generation of the world's most proven stage barrier system. Designed for professional crowd management at festivals, concerts, stadium events, and touring productions, the G3 series sets the current benchmark for front-of-stage safety.

The system is manufactured from high-strength aluminium profiles in accordance with ISO 2768 mk standards. Compared to equivalent steel barrier systems, it is approximately 40% lighter while offering exceptional strength and durability. Its modular design enables fast installation, easy configuration, and efficient transportation for touring and event logistics.

All modules – Straight, Flex, Cablegate, and Vario – are fully compatible with one another and engineered to the same certified load specifications.

The MOJO Barrier G3 is TÜV NORD certified in accordance with ISE TDS 4th Edition (Certificate No. 2400-D-228), valid until 2028. The system is certified for a horizontal load of 5 kN/m, with independent testing by Lloyds British and TNO confirming peak load values of up to 7.48 kN/m.

Technical Features

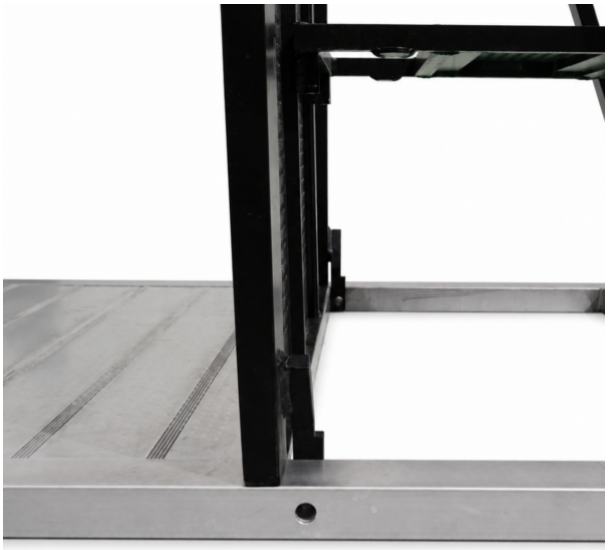

- **Certification:** TÜV NORD, ISE TDS 4th Edition – 5 kN/m, valid until 2028
- **Material:** High-strength aluminium profiles (ISO 2768 mk)
- **Certified Load Capacity:** 5 kN/m horizontal load
- **Independent Test Results:** Up to 7.48 kN/m (Lloyds British, TNO)
- **Safety Features:** Anti-climb design, anti-trip profile, reinforced connection zones
- **Modularity:** Compatible with G3 Flex, Cablegate, and Vario modules
- **Logistics:** Stackable, dolly-optimised, touring-ready
- **Applications:** Front-of-stage, side stages, FOH areas, delay towers, and special event zones
