MOJO BARRIER MEGA EXIT GATE

The MOJO Barrier Mega Exit Gate provides secure, large-scale entry and exit points, ideal for pedestrian and vehicle access at high-traffic events.

SKU: 1002541.00 | **Categories:** Concert Barricades, Mojo Barriers

PRODUCT DESCRIPTION

The MOJO Barrier Mega Exit Gate is a vital component for event safety and logistics, offering a wide 3-metre (9.84ft) opening for smooth entry and exit of pedestrians, service vehicles, and emergency response units. Constructed from durable aluminium with black steel floor plates, this double-wing gate integrates seamlessly into a MOJO barrier line, ensuring secure and controlled access.

Designed with safety and efficiency in mind, the gate doors open away from the crowd, providing unobstructed entry and exit. Its innovative vertical bolt locking mechanism features a foot lever for quick release, ensuring both security and speed in critical moments. The sloped floor plates allow vehicles to pass through with ease, eliminating the need for additional ramps, making it ideal for festivals, concerts, and events where emergency vehicle access is essential.

Whether managing large crowds or ensuring emergency preparedness, the MOJO Mega Exit Gate is engineered to withstand the demands of large-scale events while maintaining the highest safety standards.
