MOJO BARRIER VARIO CORNER, BLACK

The MOJO Vario Corner Barrier provides fully adjustable angles from -60° to +60° for customised crowd control layouts, combining stability and versatility.

SKU: 1002016.00 | **Categories:** Concert Barricades, Mojo Barriers

PRODUCT DESCRIPTION

The MOJO Vario Corner Barrier is an essential addition to any crowd control system, offering unparalleled flexibility for concerts, festivals, and large-scale events. With robust upright supports and a durable floor plate, this barrier enables precise angle adjustments from -60° to +60°, making it ideal for bespoke barricade layouts.

Designed with a central hinge and partial floor plate, the Vario Corner is perfect for accommodating complex setups such as round stages, catwalks, or secondary barricade lines. Its stable floor plate, set angle fixation, and single-bolt connection ensure seamless integration with other MOJO barriers. Assembly is fast and secure, without compromising strength or stability.

The Vario Corner's partial floor plate and brace system guarantee reliability, even under heavy crowd pressure. The sloping floor plate provides unobstructed access, while its grooved surface minimises slipping, creating a safe environment for attendees and event staff.
