# MOJO HIGH FENCE FLEX, BLACK, MULTIPLEX

The MOJO High Fence Flex in black offers adjustable multiplex panels for secure, curved crowd control layouts, ideal for VIP zones and sensitive areas.

**SKU:** 1004377.00 | **Categories:** Concert Barricades, Mojo Barriers

## PRODUCT DESCRIPTION

The MOJO High Fence Flex is designed to integrate seamlessly with the MOJO Barrier Flex Corner, creating secure and adaptable curved layouts for crowd control at concerts, festivals, and large-scale events. Featuring adjustable multiplex panels, it raises the height of the MOJO Flex Barrier to 2.4 metres, offering enhanced privacy and crowd management capabilities in high-traffic or sensitive areas.

Available in black, white, and transparent finishes, the High Fence Flex adapts to diverse event requirements. The black and white multiplex panels ensure a complete sightline kill, blocking visibility to maintain privacy in VIP zones and restricted areas. For events where visibility is key, the transparent polycarbonate option allows security personnel to monitor crowds without compromising strength or stability.

Built for quick and secure assembly, the MOJO High Fence Flex connects effortlessly with other MOJO barrier elements using a standard interlocking system. Engineered to withstand heavy crowd pressure, it adapts perfectly to curved or irregular layouts, making it an essential solution for event organisers managing complex spaces with high-security demands.
