MOJO HIGH FENCE STRAIGHT, BLACK, MULTIPLEX

The MOJO High Fence Straight in black provides added height and privacy with durable multiplex panels, perfect for securing VIP zones and restricted areas.

SKU: 1004375.00 | **Categories:** Concert Barricades, Mojo Barriers

PRODUCT DESCRIPTION

The MOJO High Fence Straight enhances event security by elevating standard MOJO barriers with solid multiplex panels, achieving a total height of 2.4 metres. This high fence adds an effective layer of privacy, making it ideal for securing VIP zones, backstage areas, and other restricted spaces at concerts, festivals, and large-scale events.

Available in black, white, and transparent finishes, the MOJO High Fence adapts to various aesthetic needs. Black and white multiplex panels create a sightline kill, blocking visibility to maintain privacy in sensitive areas. The transparent polycarbonate version ensures security personnel have an uninterrupted view, while maintaining the same durability and crowd control capabilities.

The high fence seamlessly integrates with existing MOJO Straight Barriers, preserving the structural integrity of the barricade system. Designed to withstand intense crowd pressure, it is easy to set up with an interlocking system and supports additional elements such as mega exits, gates, and doors for flexible access. This robust and visually appealing high fence is a superior alternative to traditional fencing solutions, providing both functionality and style.

PRODUCT BENEFITS

- Polycarbonate is smash-proof and hooligan-proof.
- Quick and simple to assemble.
- Exceptionally strong and durable.
- Seamlessly integrates with MOJO mega exits, gates, and doors.
- More aesthetically appealing compared to traditional fencing solutions.
- Transparent polycarbonate allows for uninterrupted security views without compromising stability.
- Adapts to split-level pavements and can cross roads.

TECHNICAL INFORMATIONS

Weight	6.4 kg
Dimensions	39.37 × 7.06 m
Colour	Black
Material	Multiplex panels with reinforced aluminium frame
Overall Height	Combined height with barrier is 2.4 metres
Compatibility	Attaches to MOJO Straight Barriers
