

MOJO HIGH FENCE VARIO, BLACK, MULTIPLEX

The MOJO High Fence Vario adds height and security to the MOJO Vario Corner, with black multiplex panels for adaptable crowd control in complex event layouts.

SKU: 1004376.00 | **Categories:** [Concert Barricades](#), [Mojo Barriers](#)

PRODUCT DESCRIPTION

The MOJO High Fence Vario is designed to enhance the MOJO Vario Corner by extending its height, creating a secure and adaptable solution for crowd control at concerts, festivals, and large-scale events. With durable multiplex panels, this high fence increases the height of the standard MOJO barrier to 2.4 metres, providing additional privacy and crowd management capabilities.

Available in black, white, and transparent finishes, the High Fence Vario suits a variety of event needs. The black and white multiplex panels deliver a full sightline kill, effectively blocking visibility into VIP zones or restricted areas, ensuring privacy for sensitive sections. The transparent polycarbonate version allows security personnel to maintain clear visibility while retaining the fence's strength and stability, ideal for events requiring both crowd control and visual monitoring.

Seamlessly integrating with the MOJO Vario Corner, the High Fence Vario uses the same standard interlocking system for quick and secure assembly. Its flexible design accommodates curved and angled layouts, making it perfect for complex configurations such as round stages, backstage areas, or designated VIP sections. Built to withstand heavy crowd pressure, this high fence extension ensures reliable protection for high-traffic zones while maintaining the highest standards of security and discretion.

TECHNICAL INFORMATION

Weight	14 kg
Dimensions	0.97 × 0.018 × 1.22 m
Colour	Black
Material	Multiplex panels with reinforced aluminium frame
Connection	Standard interlocking system, compatible with MOJO barriers
Overall Height	Combined height with barrier is 2.4 metres
